

Updated Open-Source Packages for OpenServer 6D 2018 & UnixWare 7D 2018

XinuOS has implemented significant updates to **Patchck**, focusing on enhancing security and streamlining the update process.

Major Updates:

1. Updated Open-Source Packages for OpenServer 6D 2018 & UnixWare 7D 2018:
 - OpenSSH 9.9p1a (PAM support added for OpenServer 6D 2018 MP1 & 7D 2018 MP1)
 - Rsync 3.4.1
 - Sendmail 8.17.2h (minor fix for masquerade feature)
 - Xinuocurl 8.10.1
 - Security fixes in OpenSSH, rsync, and Xinuocurl
2. Patchck Code Streamlining
 - Obsolete automation removed:
 AUTO option and autopatchck shell script
 - Improved installation flow:
 Manual intervention now required for better control
 - Better update efficiency
3. Patchck Package Format Change for OpenServer 5D & 6D
 - One-time two-step update required to transition to the "pkgadd" package format "patchck -u" needs to be run twice
 - Future updates will use a single "pkgadd" process

Key Notes:

1. OpenSSH:
 - Updated from 7.3p1f to 9.9p1a
 Check the release notes before updating @ [OpenSSH 9.9p1a Release Notes](#)
2. LDAP & Active Directory Authentication:
 OpenServer 6D2M2 now supports PAM authentication using "Xinuossnss-pam-ldapd" or "Xinuossamba"
3. Currently supported OS versions are now:

- OpenServer 5 Definitive 2018
- OpenServer 6 Definitive 2018
- UnixWare 7 Definitive 2018
- Previous versions back to OpenServer 5.0.7. OpenServer 6.0 and UnixWare 7.1.4 are only supported by purchasing a “Retired Support” Agreement
